

Splashbacks Make it Easy to Keep Your Spaces Clean

Splashbacks are an essential in kitchens and wet areas but why exactly are they such a great, if not necessary choice? Here's everything you need to know about why they are so useful. Read on for more.

The primary benefit of using splashbacks in your kitchen or in other wet areas of your home is that it helps make it so much easier to keep your spaces clean. Splashbacks are designed to take any spills, splashes of food, water, oil and grease, and so on, so that they don't get onto your walls where they can be difficult to get off or worse still, they can stain the paint. Splashbacks on the other hand can be easily wiped clean, so that your kitchen or other spaces look pristine and new at all times.

Splashbacks Look Beautiful

Splashbacks also make a brilliant feature in any room of the home where they are used. This is because you have practically limitless options. Splashbacks can be made from glass, acrylic glass, aluminium like metaline, mirrors, tiles, stainless steel, laminate, engineered or natural stone and, as you can imagine, the choice in materials gives you even more choices in terms of colours and patterns. You can even inset lights behind your splashback if you want to! Splashbacks can be solid colours that complement your benchtops and appliances, or they can be patterned in just about any way that you can imagine.

If you want to, you can "dial" the splashback back so that it is just something that blends in with the kitchen, bathroom or laundry, or you can go in completely the opposite direction and choose a splashback that becomes the main feature of the room. It really is up to you.

Splashbacks are Safe and Hygienic

No matter what type of splashback material you choose, you can rest assured in the knowledge that your splashback is both safe and hygienic. Splashbacks are designed to be totally oil, grease and water resistant, so even the biggest of messes won't cause staining or damage. They are also completely non flammable so are safe for use behind stovetops. Splashbacks are also incredibly easy to clean and you can clean them with a simple household cleaner and a cloth. In most cases, just a damp cloth is more than enough.
