

Say "goodbye" to grout – forever!

A Splashback is an architectural feature which is designed to be both ornamental and functional in areas where water is involved. Acrylic and Metaline splashbacks have protected walls effectively in kitchens and bathrooms in homes, restaurants and offices for many years.

Acrylic Splashbacks are used for Kitchen and Showerbacks and as well as being cost effective this material is available in a wide range of applications, due to the durability of the product it guarantees, an easy to clean surface with no more grout or scum which is scratch resistant and shatter-proof which means no more glass or tile breakages. You can choose from a large range of stylish colour options with the convenience of simply installing over the top of your existing tiles.

Metaline Splashbacks are versatile and can be used in kitchens and bathrooms. Laminex Metaline is a highly durable advanced aluminium – based splashback system that is practical and appealing. The clean, continuous look and contemporary range of colours is perfect for helping you create a stunning modern kitchen or bathroom or enhance any other vertical wall. Metaline Splashbacks have many features and benefits including: flame retardant technology, suitable to use behind gas and electric

cooktops, 4mm slimline thickness, high gloss finish, available in 21 modern colours, mark and stain resistant and the installation process is time efficient.

DIY – If you are a DIY person looking at renovating or building your own home, or maybe just needing a fresh modern look, you will need to choose the colours and finishes that will compliment your interior decor and look the way you want.
